SUMMARY

I'm Rishabh Pandey, a B.Tech CSE-AIML student with a strong interest in data analysis and problem-solving. I enjoy working with SQL, Python, and data visualization tools such as Power BI to uncover meaningful patterns from raw data. With a solid foundation in analytics, a growing knowledge of machine learning, and a curiosity to explore real-world datasets, I am eager to turn data into impactful decisions. I am also improving my skills in Data Structures and Algorithms (DSA) by solving problems in C++, focusing on core concepts like stacks, queues, and more.

EDUCATION

B.Tech, CSE(AIML)	Graduating May 2027
VIT Bhopal	
Class 12th	Graduating 2022
Jagran Public School	

TECHNICAL SKILLS

Data Analysis Tools: Excel, Power BI, Tableau

Programming Languages: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, C++

Database Management: MySQL, PostgreSQL

Statistical Analysis: Hypothesis Testing, Correlation, Regression

DSA (Data Structures & Algorithms): Arrays, Linked Lists, Stacks, Queues, Recursion, Searching & Sorting

EXPERIENCE

AI Intern

AMASQIS.AI – Remote

May 2025 – Present

- Assisted in data preprocessing, model training, and evaluation for AI-based solutions.

PROJECTS

Text Editor using Tkinter (Python GUI Project)

Designed and built a lightweight text editor using Python's Tkinter library with a fully functional GUI.

- Implemented features like open/save files, cut/copy/paste, text formatting, and font selection.
- Used event-driven programming concepts and organized the code using OOP principles.
- Integrated Catppuccin inspired color theme with toggle support for dark and light modes.

Retail Sales Analysis using SQL

Performed data analysis on retail sales data using SQL to uncover trends and business insights.

- Cleaned and transformed raw sales data using SQL queries for accurate analysis.
- Analyzed monthly revenue, product performance, and customer behavior patterns.
- Helped identify top-selling products, peak sales periods, and underperforming categories.
